

Complete the function solveMeFirst to compute the sum of two integers.

Function prototype:

```
int solveMeFirst(int x, int y);
```

where,

- x is the first integer input.
- y is the second integer input

Return values

- sum of the above two integers

Sample Input

```
x = 2  
y = 3
```

Sample Output

```
5
```

Explanation

The sum of the two integers x and y is computed as: $2 + 3 = 5$.
